RailConnect™ 360–a GE Predictivity™ solution

Boost productivity

ShipperConnect™ Transload Management

See your productivity improve with enhanced inventory-on-rail visibility.

Delayed shipments. Product shrinkage. Demurrage charges. When terminal operators have limited visibility of inbound and outbound railcars and inventory, the impact can be significant—and costly.

ShipperConnect Transload Management gives bulk terminal managers the visibility they need to control inventory movements—inbound, outbound or on-site. A powerful bulk terminal management software solution, Transload Management provides a single source of product-in-transit information across one or multiple facilities, communicating in real time and automating workflow to more efficiently fulfill customer orders.

CORE CAPABILITIES

- Off-rail railcar visibility
- Off-rail inventory control
- Equipment spot management
- Inbound/outbound order processing
- Workflow automation

DIFFERENTIATING FEATURES

- Built-in rail logistics expertise
- Seamless integration (AEI, EDI, ERP)
- Quick to deploy (cloud-based)

OPTIMIZED OUTCOMES

- Increase terminal productivity
- Control product loss
- Minimize logistics costs
- Improve customer service

The result? Better railcar and shipment visibility. Reduced inventory shrinkage. And maximum productivity.
